

Cloud-based Assessment Platform & Comprehensive Dashboard for User Management

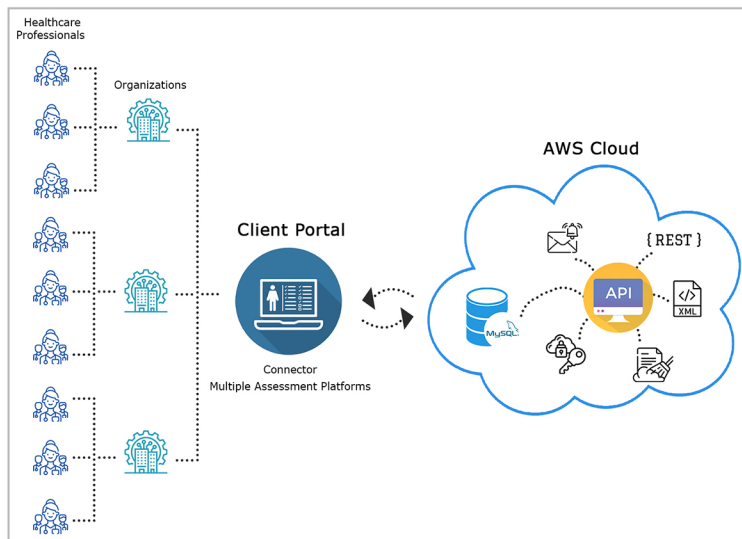

Industry
Healthcare

THE NEED

Our client is a U.S. based specialty nursing organization dedicated to the practice of medical-surgical nursing with over 10,000 medical-surgical registered nurses. They wanted to manage their database of users, register them, administer the assessment and get an overview of all the multilevel users.

THE REQUIREMENTS

- o A cloud-based skill assessment platform for multilevel user groups- Individuals, Organizations, and Super admin.
- o Multiple organizations can register to access the skill-based assessments.
- o The dashboard should also display the analytics of the entire organization.
- o Library of APIs to connect the master organization with individual users and other organizations.
- o Extensive configuration options to super admin.

THE SOLUTIONS

- o Customized super admin, admin and user features tailored to business specific needs.
- o As a super admin the client can add and configure more assessments as per the requirement.
- o Separate functionalities of each user group with defined operational parameters and goals.
- o Statistical and graphical reports for a complete overview of dashboard to the super admin.
- o B2B integration solution to sync licenses for multiple organizations and users.
- o Extensive configuration options to the super admin for flexibility.

THE BENEFITS

Streamlined the process for administering assessments.

Access to data, anytime and anywhere with internet access.

Real-time tracking of all users and their activity.

Data driven analytical insights for real-time decision making.
